

8 October 2019

IEA Wind Task 32 General Meeting 2019

Date: 11 and 12 December 2019

Venue: DTU Risoe Campus, Roskilde, Denmark

Introduction

The General Meeting provides a forum to build up a community, report from previous workshops, and organize new ones.

The 2019 General Meeting is focused on technology transfer; we want to bring people with ideas or solutions together with those who have needs, get out of your way, and see what you can do.

And, we'd like to know how the Task can help you. Maybe you want to use the Task to set up a working group to put together some code, or write a recommended practice, or even a white paper to get people thinking? Maybe you have completely different ideas about how to leverage the international community of Task 32. Let us know!

Program Draft

We know that you are all interested in lots of things and really would like to talk to everyone at the meeting, but you have limited time and your employer would prefer you to focus on something that helps them... So, we're going to try to help. Along with lots of opportunities to talk, we're going to borrow some ideas from [Dragon's Den / Shark Tank / etc.](#) and ask you to pitch your ideas and interests to each other on the first day, before putting together groups to make progress on the second day. We'll also use this to help set our agenda for the next year or so.

This means we need your help. Please be ready to suggest things that you think the Task 32 community should be thinking about. This means your new ideas, or your unmet needs, or whatever. You can also bring posters if you'd like to share your ideas that way.

We welcome your feedback on the agenda and your offer of presentations, posters, and other ideas.

Please note the following program is subject to change. The most recent version can always be found [on our website](#).

Day 1: Where are we?

9:00	Arrival with coffee & poster session (also open to DTU)
10:30	Greeting and round-the-room introductions Housekeeping + Introduction Round
